Nguyễn Gia Phong

Backend Developer Intern

0869278516 phongnguyengia82@gmail.com github.com/Zaphong11 Kien An, Hai Phong

OBJECTIVE

Final-year Information Technology student with skills in Python backend development, AWS cloud services (EC2, RDS), and RAG systems. Seeking a Backend Developer Intern/Fresher position to apply technical skills in building scalable solutions while growing expertise in software engineering.

DANH HIỆU VÀ GIẢI THƯỞNG

Third Prize - University-level Scientific Research	4/2025
First Prize - Faculty-level Scientific Research	5/2025

TECHNICAL SKILL

Programming Languages	Python, C#, HTML, JavaScript
Backend Frameworks	FastAPI, ASP.Net Core, LangChain
Database	MySQL, PostgreSQL, SQL Server
Cloud & DevOps	AWS (EC2, RDS), Linux/Unix
Version Control	Git, GitHub
Other	Docker (basic), RESTful API, RAG systems

PROJECTS

Online Judge & Code Execution Engine | 1st Prize, University-Level Scientific Research (2025) 10/2024 - 5/2025

Backend Engineered

- Developed the backend engine for a competitive programming platform (similar to LeetCode/Codeforces), which secured 1st prize in university-level research
- Engineered the core API using Python (FastAPI) to handle user submissions and deliver judging results.
- Implemented a secure execution solution by integrating the 'Isolate' (IOI) sandbox on a Linux server, ensuring safe code execution by enforcing strict time and memory limits.
- Developed a basic UI with HTML, CSS, and JavaScript for project demonstration and testing purposes.
- Technologies Used: Python, FastAPI, Linux, Isolate Sandbox (IOI) MySQL/PostgreSQL, Git, HTML, CSS, JavaScript.
